

# Spotifamily API-Requests

This short summary will give insights on how the Spotifamily.com API works. You can use the API with any **whitelable key** one can buy under our resellers section. Those keys are in the format XXXX-XXXX-XXXX.

Our API is fully JSON responding and can be used to fully make your own reselling website without even mentioning Spotifamily itself. It can also be used to create a new API for your business.

## 1 – Checking stock

To see, how many upgradable options are left per country, one should request the current stock before showing country options.

`https://api.spotifamily.com?stock`

Example Reply:

```
[{"country": "Australia", "country_code": "AU", "slots": 18}, {"country": "Bolivia", "country_code": "BO", "slots": 1}]
```

## 2 – Get Key Info

To check the current key status, one can check the keys information. This can only be done with a valid whitelable key and not with personal or family keys.

`https://api.spotifamily.com?info={KEY}`

Error Reply:

```
{„status“:“error“, „message“: „Error Reason“}
```

Success Reply:

```
{„status“:“success | processing | replaced | failed“}
```

Variables:

{KEY} – Purchased key to validate.

### 3 – Upgrade Keys

Keys can be upgraded at any time after valid login data and a country has been provided. Make sure, that the chosen country is in stock by requesting the stock prior to upgrading.

```
https://api.spotifamily.com?upgrade={KEY}&login={LOGIN}&pwd={PWD}&country={COUNTRYCODE}
```

#### Error Reply:

```
{„status“:“error“, „message“: „Error Reason“}
```

#### Success Reply:

```
{„status“:“success“}
```

#### Variables:

{KEY} – Purchased key to validate.

{LOGIN} – Spotify email/username of account to be upgraded

{PWD} – Password of Spotify account to be upgraded

{COUNTRYCODE} – Country code, e.g. for United States „US“

### 4 – Renew Account

If a subscription should run out, one can renew the account with a renew request, so the key gets renewed and can be used to upgrade an account again.

```
https://api.spotifamily.com?renew={KEY}&login={LOGIN}&pwd={PWD}
```

#### Error Reply:

```
{„status“:“error“, „message“: „Error Reason“}
```

#### Success Reply:

```
{„status“:“success“}
```

#### Variables:

{KEY} – Purchased key to validate.

{LOGIN} – Spotify email/username of old account

{PWD} – Password of Spotify account that lost premium access
